

RABBIT HUTCH PLANS

Drawing	Description
RH-001.....	floor
RH-002	panelling and braces
RH-003	legs
RH-004	partition
RH-005	front panel
RH-006	door
RH-007	roof
RH-008	assembly - frame
RH-009	assembly - panels
RH-010	assembly - partition
RH-011	assembly - roof
RH-012	assembly - doors

Notes:

The drawings are scaled as stated when printed on A2 paper, if an A2 printer is not available set the print output to tile or fit to page, in which case the resulting print will not be to scale.

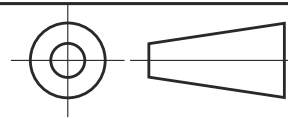

The dimensions are nominal and no allowance has been made for variations in timber sizes or inaccuracies in making. Therefore it is recommended that the hutch be built in the following stages, adjusting the components as required.

- construct floor, fit legs.
- cut and fit braces at top.
- cut panels to suit and assemble.
- cut and fit partition.
- construct front panel and door to fit.
- construct roof and cover with felt.
- fit door and roof.

If required a simple prop can be added to hold the roof open. obtain a suitable piece of wood which will fit between the side brace and side panel. Cut to length, drill a hole at one end then drill a hole in the side brace in a suitable position, insert a screw through both into the side panel ensuring the prop moves easily. Add another screw to support the prop in the closed position if necessary.
